ACKNOWLEDGEMENTS

I assume that I have taken a great way in this demanding graduate program and learnt so many new things for my future career. Therefore, I would like to thank to many people who supported, inspired and guided me in this process.

First and foremost, I would like to thank my supervisor Assoc. Prof. Dr. Şehnaz ŞAHİNKARAKAŞ for her priceless support, guidance and kindness to me during the classes and process of composing this thesis. Therefore, I would like to declare my deepest gratitude and esteem for her. I will always remember the sound advice you gave me throughout this demanding process.

I also would like to thank Assoc. Prof. Dr. Jülide İNÖZÜ, Assist. Prof. Dr. Hülya YUMRU as both my instructors and the members of my thesis committee. I feel fortunate that I was able to bring together such a wonderful team of scholars. I would like to thank to you all for your constructive feedback and great contributions during this period. I should also thank my instructor Assist. Prof. Dr. Kim Raymond HUDSON for his continuous teaching efforts and contributions to my learning process and this graduate program.

A special thank you goes to my wife Selen GÜNDÜZ for her love, support and encouragement as my partner. You never spared your support and your encouragements from the beginning of this graduate program to the end of the process of inscribing this thesis. Without your absolute belief in me, I would not have been able to accomplish this task. To my children, Miray and Baby Girl #2, please know that my reason for wishing to complete this program was a personal goal, but it was also for you. Your presence has always inspired me.

Lastly, I would like to thank Assist. Dr. Arif BAKLA and Selim ÇAM for their invaluable contributions for collecting the data of this study and for their encouragements.
