PREFACE

The rapid social and technological transformations experienced in the age of information bring about profound changes in the field of education as well. New needs and problems emerging at every level of education have increased both the number and the diversity of research conducted in this field. In this dynamic environment, it is more important than ever for the discipline of educational sciences to follow current developments, interpret them, and offer solutions.

This book titled *Current Research in Education* has been compiled by bringing together original academic studies conducted in different subfields. Our aim is to contribute to the production of up-to-date, high-quality knowledge that can be transformed into practice for both academic circles and practitioners. The chapters included in the book address, from a scientific perspective, the issues faced by today's education systems across a wide range of areas, from instructional technologies to measurement and evaluation, from educational administration to curriculum development, and from special education to teacher education.

I would like to express my sincere thanks to our esteemed authors who contributed to the preparation of this book, to our reviewers who carried out the evaluation process with scientific rigor, and to the publishing house team who provided support at every stage of the process. At the same time, I hope that this work will inspire new research in the field of education and serve as a reference source for teachers, administrators, academics, and graduate students.

With the wish that it will be a resource capable of illuminating the path of everyone who contributes to education…

PROF. DR. GİZEM SAYGILI

İÇİNDEKİLER

Chapter 1

Accreditation in Higher Education:
Does it Restrict Academic Freedom? **1**

Asil DERİN

Chapter 2

Reflections of the Concept of McDonaldisation
on the Higher Education System: A CrItIcal RevIew **9**

Asil DERİN

Chapter 3

A Critical Approach to Artificial Intelligence
Approaches in Learnıng Envıronments **16**

Barış AYAZ

Chapter 4

Beyond The Classroom Walls:
Theoretical Foundations of Authentic Learning **31**

Burak AYÇİÇEK

Chapter 5

Rethinking Education Through Waldorf and Reggio Emila:
Alternative Approaches to Curriculum **52**

Burak AYÇİÇEK
